### More charge and discharge cycles

We individually measure battery cells to ensure their performance and service life.

### Low overall costs

The higher capacity guarantees higher cost effectiveness over their total running life.

### Maximum security

The flex-board technology reliably protects the battery against overcharging.

### High-carat connections

Gold-plated contacts prevent corrosion and ensure a loss-free current output.

### All-round premium

For the housing: no recycled plastic, but rather high-quality ABS/PC.
