Battery Technology

More charge and discharge cycles
We individually measure battery cells to ensure their performance and service life.

Lower overall costs
The higher capacity guarantees higher cost effectiveness over their total running life.

Maximum security
The flex-board technology reliably protects the battery against overcharging.

High-carat connections
Gold-plated contacts prevent corrosion and ensure a loss-free current output.

All-round premium
For the housing: no recycled plastic, but rather high-quality ABS/PC.
